## **FLOODPLAIN DEVELOPMENT PERMIT APPLICATION**

### **APPLICABILITY**

**"Flood" or "Flooding"** means a general and temporary condition of partial or complete inundation of normally dry land areas from:

- A. The overflow of inland or tidal waters and/or,
- B. The unusual and rapid accumulation or runoff of surface waters from any source.

**"Base flood"** means the flood having a one percent chance of being equaled or exceeded in any given year.

**"Mean sea level"** means for purposes of the National Flood Insurance Program, the National Geodetic Vertical Datum (NGVD) of 1929 or other datum, to which base flood evaluations shown on a community's flood insurance rate map are referenced.

**"Area of special flood hazard"** means the land in the floodplain within a community subject to a one percent or greater chance of flooding in any given year.

**"Critical feature"** means an integral and readily identifiable part of a flood protection system, without which the flood protection provided by the entire system would be compromised.

**"Flood insurance rate map" (FIRM)** means the official map on which the Federal Emergency Management Agency has delineated both the areas of special flood hazards and the risk premium zones applicable to the community.

**"Development"** means any man-made change to improved or unimproved real estate, including but not limited to, buildings or other structures, mining, dredging, filling, grading, paving, excavation or drilling operations located within the area of special flood hazard.

**"Start of construction"** includes substantial improvement, and means the date the building permit was issued, provided the actual start of construction, repair, reconstruction, placement or other improvement was within one hundred eighty days of the permit date. The actual start means the first placement of permanent construction of a structure on a site, such as the pouring of slab or footings, the installation of piles, the construction of columns or any work beyond the stage of excavation; or the placement of a manufactured home on a foundation. Permanent construction does not include land preparation, such as clearing, grading and filling; nor does it include excavation for a basement, footings, piers or foundations or the erection of temporary forms; nor does it include the installation on the property of accessory buildings, such as garages or sheds not occupied as dwelling units or not part of the main structure.

**"Substantial improvement"** means any rehabilitation, addition or other improvement of a structure, the cost of which equals or exceeds fifty percent of the market value of the structure before the "start of construction" of the improvement. This term includes structures which have incurred "substantial damage," regardless of the actual repair work performed. The term does not, however, include either:

- A. Any project for improvement of a structure to correct existing violations of state or local health, sanitary or safety code specifications which have been identified by the local code enforcement official and which are the minimum necessary to assure safe living conditions; or
- B. Any alteration of a "historic structure."
